

Item Code: 9573-GOLD-TCH-EN**Product description:** TOUCH wired keypad GOLD 869 Series.

Main features: Wired keypad with LCD touch-screen display that can be connected via BUS to all GOLD 869 Series control panels. It has a 4.3 " display with resistive touch-screen that offers the user a better interactivity than traditional keypads. Modern design and eye-catching graphics interface make it the ideal device for home environment. Its main screen allows you to quickly view the system status, date, time, room temperature and connectivity status. It is provided with three customizable buttons for fast access to the most used program combinations. Through the input management menu, you can quickly consult their status and possibly exclude them. The TOUCH keypad is equipped with the "Emergency Lamp" function, which, if enabled, turns on the display in case of current absence. It is designed to be placed on a 503 box to facilitate mounting. It is a user keyboard, so it allows the system to be managed, but not its configuration. White colour.
